

**AMENDMENT TO THE SPECIFICATION**

Please replace page 10, first paragraph (lns. 1-10) with the following paragraph. The Replacement Paragraph is shown with added text in underline and deleted text in strikethrough.

**REPLACEMENT PARAGRAPH:**

The animation file 16 also includes an end of file indicator 41 ~~51~~. In this way the batch processor 18 can easily identify the last image in the animation. Although animation file 16 is shown providing a list of individual image files, it will also be appreciated that the graphical image content for all the images in the animation may be stored in fewer or even a single graphical file. If a single graphical file were used, then the file identifier 45 ~~54~~ may be used to indicate a location or position in a graphical file for locating the image. The file identifier may further include an end position or notation to assist in locating the end of that particular image. It will also be understood that different file arrangements may be used consistent with this disclosure.
